Address: Not Provided

Status: Discharged

Summary:

DISCHARGE SUMMARY

Patient Information:

Name: Safwan Mondal

ID: 0001

Age: 45

Gender: Male

Admission and Discharge Dates:

Admitted on: 2025-03-01

Discharged on: 2025-03-07

Chief Diagnosis:

Pneumonia

Treatment and Procedures:

The patient received antibiotic therapy as treatment for pneumonia. During their hospital stay, the patient underwent a chest X-ray and blood test as part of their diagnostic workup.

Medications:

The patient was prescribed Azithromycin and Paracetamol during their hospitalization.

Clinical Course:

According to the doctor's notes, the patient responded well to treatment and did not experience any complications.

Test Results:

The patient's complete blood count (CBC) was within normal limits. The chest X-ray showed improvement, indicating a positive response to treatment.

Vital Signs at Discharge:

The patient's vital signs at the time of discharge were: Blood Pressure - 120/80 mmHg, Pulse - 76 beats per minute, and Temperature - 98.6°F.

In summary, the patient was hospitalized for pneumonia and received antibiotic therapy. They responded well to treatment and were discharged without any complications.
